18/09, 20/09 and 22/09/2018

The Mozilla Campus Club of BV(DU)COE, Pune conducted a workshop on 'C\C++ Programming' on the 18th, 20th and 22nd of September, 2018. The workshop was free of cost and open for all the students studying in BV(DU)COE. The workshop was conducted for the students who want to be innovative, creative, exceptional and unique. Mr.Naman Dhameja and Aditi Singhal Member, Mozilla Campus Club were the key speakers for this workshop.

On the first day, the workshop started with the introduction to programming and the basics of a programming language, namely, C and C++. The students were taught how to write an algorithm technically. A sample program was written in front of the students and the stepwise execution of that program was taught to them. The difference between C and C++ programming was also highlighted for the students, that is mainly in the syntax of both the programming languages.

In the next session, the students were taught how to perform mathematical operations in the program and writing loops in the program for flow control. At the end of the day the students were evaluated by assigning them a problem statement and writing a program for achieving it.

In the final session of the workshop, the speaker discussed regarding the assignment given to the students at the end of second session. The session was concluded with the discussion regarding string processing and various data structures in C and C++.

With the tremendous response from the students, the workshop turned out to be a huge success.
