A report on Student Training Program on “Android Development for Future”

Department of Basic Science and Humanities conducted a **Student Training Program on Android Development for Future** on 07/03/2019 for first year students of the Department of Computer Science and Engineering. The Program was focused on the practical applications of Android Development through hands on sessions, which helped students to enhance their knowledge in the field of Android Development and assisted them to widen their horizon of varied applications of the computer field. The deliberation and hands on session on the topic “**Android Development**” was conducted by Prof. Dr. Rajesh B. Ghongde.

In the forenoon session of the program Prof. Dr. Rajesh Ghongade enlightened students about the importance of android technology and its uses through different applications. He has put insight on the topic from different perspectives to make students understand the significance of android through hands on sessions. The afternoon session was entirely focused on doing applications of android commands through hands on sessions.

Glimpses of Student Training Program
