

BHARATI VIDYAPEETH UNIVERSITY
COLLEGE OF ENGINEERING, PUNE

IEEE STUDENT BRANCH

FROM THE DESK OF PROF. ANAND BHALERAO:

DEAN AND PRINCIPAL, BVU COLLEGE OF ENGINEERING, PUNE

IEEE (Institute of Electrical and Electronics Engineers) is a gateway to enter into the world of latest technologies and to come across the people who invent, design and develop the techniques in the field of Engineering.

IEEE student Branch gives platform to the students to show their talent in their social life as well as in the technical field. Under IEEE Student Branch various events are organized which are useful to the students to upgrade their technical background. Keeping this view in mind IEEE student Branch organizes various technical events like Cuestionario (An Inter College-Technical as well as General Quiz Competition) and series of seminars based on upcoming issues to enhance teaching and learning skills as well as to develop an ability to take initiation amongst the students who work for IEEE Student Branch.

IEEE Student Branch made its presence across the city throughout the year to motivate not only the BVUCOE students but also to other college students through their participation in various technical events.

Active participation in student activities could lead to future career and professional networking opportunities. Activities during student events can prepare young IEEE members with professional development skills as they leave the college or university to enter the professional workforce.
